Personal Report:

Personal Experience:

- I totally agree with the team report.

Reasons for agreement:

- As mentioned in the team report , we had successful meetings and were conducted as per the schedule.
- Due to proper management of team meetings we almost completed our project on time.
- And the best part was that my partner was very matured and punctual because of which we always used to remain ahead of time.
- He was very co-operative during the whole project and was always there to help me when ever needed.
- As I and my partner were both international students we both built a good friendly relationship while doing the whole project. We both used to go together for lunch and talked about our cultures to each other which I found very interesting.
- Also, as my partner had good work experience, so he had good knowledge of Java which helped me a lot in learning new things in java.
- There were some hard times when we both had troubles in debugging an error but in the end we successfully made it work and in over all, I enjoyed a lot doing this project together.
- In the end I would like to thank professor for assigning us a team project and not an individual project because of which I made a new good friend and learned a lot many things from my partner.
